Advanced Automated Administration with Windows PowerShell

A three-day course in automating administration with PowerShell on Windows Server 2025, covering Azure, Active Directory, Entra ID, SQL Server 2025, virtual machines, remote administration and file management.

DURATION	CONTENT	LEVEL	DELIVERY
3 Days	12 Modules	Advanced	Instructor-Led · Bootcamp · Self-Paced

WHAT SETS THIS COURSE APART

01

Updated for Windows Server 2025

Special attention goes to new capabilities in Windows Server 2025 and PowerShell 7+.

- Modern PowerShell 7+ language features
- SQL Server 2025 administration with PowerShell
- Microsoft Entra ID and Azure automation

02

AI Tutor, available 24/7

An interactive AI assistant is built into the courseware platform, at no additional cost.

- Answers questions in real time
- Explains scripting constructs, identity cmdlets and cloud automation
- Covers all other course topics

03

Lab simulations, at the student's pace

Students step back and forth through each lab exercise, revisiting any step as needed.

- Runs in a browser, with no setup required
- Replay any time, including after class
- Covers the lab in every module

ALSO INCLUDED

Bootcamp mode	One capstone lab per day. Students apply that day's skills to a new scenario with no procedure and no hints.
Identity	User, group and access management for Active Directory and Entra ID.
Infrastructure	Azure resources, Hyper-V virtual machines and Desired State Configuration.
Security	Security monitoring, compliance reporting and audit log analysis.

CURRICULUM AT A GLANCE

DAY 1	**Scripting, identity and cloud.** Advanced scripting techniques, Active Directory, Microsoft Entra ID, and Azure infrastructure.
DAY 2	**Servers and deployment.** Desired State Configuration, Hyper-V, software deployment and patching, and remote administration.
DAY 3	**Data, network and security.** File systems and storage, SQL Server 2025, network configuration, and security monitoring and compliance.

What your team leaves with

The ability to implement advanced PowerShell automation for Windows Server 2025, automate identity and access management across Active Directory and Entra ID, deploy and manage Azure and virtualization platforms, configure servers with Desired State Configuration, and automate SQL Server 2025, network, security and compliance tasks.

Prerequisites: experience using PowerShell in a server environment, basic PowerShell scripting skills, familiarity with Microsoft Azure, and a basic understanding of databases.
